PROFILE

Over the past ten years, I've built products for companies, businesses and government entities around the globe with a focus on design, usability, accessibility and inclusivity.

While the products I design have been in the built environment, the skills I have learned as an architect and designer are all applicable to digital design. From working with multi-disciplinary teams, to iterating through design concepts and working with stakeholders, I am committed to meeting client expectations while creating great user experiences.

EDUCATION

CODECADEMY
Front-End Engineer track
Winter 2022 to present

EXPERIENCE

Smithgroup, Washington, District of Columbia
2015 to present - Designer & Architect

- Develops innovative and visually compelling concepts for experiential spaces, while considering human-centered design best practices.
- Leads the 3D production process by mentoring peers and implementing the latest trends and innovations in AR, VR and real-time rendering.
- Manages system coordination on large scale projects involving multi-disciplinary teams of engineers and designers.
- Involved in all project phases from early design iterations to project documentation.
- Promotes the company brand through online and in person community activities and organization involvement.

Miles Associates, Oklahoma City, Oklahoma
2012 to 2015 - Project Coordinator

- Led 3D visualizations effort by creating compelling digital experiences and identifying software and workflow needs.
- Developed the company Website Design using Squarespace CMS.
- Assisted project teams on crafting design, construction documentation and project pursuits.
